EXPERIENCE AND PROJECTS

Volunteer

IT and Marketing department

2022 - present

- Active development of a student application, responsible for debugging and styling using CSS.
- Future responsible for building the official website of the Student Association of the Faculty of Administration and Business, demonstrating skills in web development.
- Involved in creating the design of posts, descriptions and organizing events.

Resume Generator

Web application that allows programmers to create customized resumes

React | SCSS | API | Local Storage

- Provides an intuitive and user-friendly interface (especially for programmers) for creating customized resumes in real-time with the ability to easily edit HTML and CSS code to fit unique needs
- With automatic saving feature, each modified version of your resume will be safely stored and ready for future use

Crypto Tracker

A multi-page application that displays cryptocurrencies using API

React | SCSS | Axios | API

- Learned how to work with APIs in JavaScript and React
- The first page displays the cryptocurrencies and allows you to search in real time for any currency, and the second page displays detailed information about the cryptocurrency chosen by the user

Chrome Extension

New Tab Dashboard Chrome Extension

JavaScript | SCSS | Local Storage | Figma | API

- Learned how JSON and Chrome Extensions work
- The project includes features like: modern live gradient background; current temperature + location + representative image for the state of the weather in real time; current time, to do list (add, delete & edit tasks) using Local Storage
