PROJECTS

Resume Generator

Web application that allows programmers to create customized resumes   React | SCSS | API | Local Storage
- provides an intuitive and user-friendly interface (especially for programmers) for creating customized resumes in real-time with the ability to easily edit HTML and CSS code to fit unique needs
- With automatic saving feature, each modified version of your resume will be safely stored and ready for future use

Crypto Tracker

A multi-page application that displays cryptocurrencies using API   JavaScript | SCSS | React | Axios | API
- Learned how to work with APIs in JavaScript and React
- The first page displays the cryptocurrencies and allows you to search in real time for any currency, and the second page displays detailed information about the cryptocurrency chosen by the user

Chrome Extension

New Tab Dashboard Chrome Extension   JavaScript | SCSS | Local Storage | Figma | API
- Learned how JSON and Chrome Extensions work
- The project includes features like: modern live gradient background; current temperature + location + representative image for the state of the weather in real time; current time, to do list (add, delete & edit tasks) using Local Storage

Notes App

Notes app to create cards with different notes   React | SCSS | Local Storage | Swal JS
- Learned how to work better with React components and Local Storage
- The project helps you to create notes with some features, like: character count limit, store notes in local storage, dark/light theme, search notes in real time
